## We handle your entire project under one roof

---

ELBAS International Co Limited is a build and engineering partner bringing civil, electrical and mechanical contracting together with supply chain and hardware. One coordinated team takes a project from the first foundation to final handover.

By combining the trades that most projects have to juggle across separate vendors, we remove the costly handoffs, scheduling clashes and supply gaps that slow construction down.

## Five disciplines, one delivery team

---

### Civil & Building Engineering

Foundations, structures and finishing — commercial, industrial and residential buildings built to last.

- Foundations & structural works
- Commercial, industrial & residential builds
- Finishing & handover

### Electrical Engineering

Wiring, panels, lighting, solar and backup systems — safe, compliant, energy-efficient installations.

- Wiring, panels & lighting
- Solar & backup power systems
- Compliant, energy-efficient installs

### Mechanical Engineering

HVAC, plumbing, fire systems and industrial machinery installation & maintenance.

- HVAC & plumbing
- Fire-protection systems
- Industrial machinery install & maintenance

### Supply Chain & Logistics

Procurement, customs clearance and logistics that keep your project supplied and on schedule.

- Procurement & sourcing
- Customs clearance
- Delivery & logistics

### Hardware & Building Materials

A reliable supply of quality hardware and building materials for projects of every size.

- Quality building materials
- Hardware & tools
- Bulk & project supply

## From first call to final handover

---

### 01 Consultation & Planning

We assess your requirements, site and goals, then scope the right approach and budget.

### 02 Design & Engineering

Our engineers turn the brief into compliant, buildable designs with a clear delivery plan.

### 03 Build & Install

Civil, electrical and mechanical teams execute on site, coordinated under one roof.

### 04 Handover & Support

We commission the works, hand over a finished project, and stay available for ongoing support.

## Built for every sector

---

#### Commercial

Offices, retail and mixed-use developments.

#### Residential

Homes, apartments and housing estates.

#### Mining & Energy

Site works, power and solar installations.

#### Industrial

Factories, processing plants and warehouses.

#### Government & Public

Public infrastructure and institutional buildings.

#### Education & Healthcare

Schools, clinics and hospitals.

## One partner accountable for the whole build

---

### One Roof, One Contractor

Civil, electrical and mechanical works coordinated by a single accountable team — fewer handoffs, fewer delays.

### Foundation to Handover

We carry your project the full distance, from groundworks through to a finished, commissioned building.

### Compliant & Safe

Installations built to standard — safe, inspected and energy-efficient, protecting people and investment.

### Supply Backed

Our own supply chain and hardware arm keeps materials flowing, so site work never stalls.
